

Martin Sagat

Software Engineer

As a Software Engineer, Martin brings over three years of professional experience in diverse industries such as Marketing, Logistics, and Health. His journey began as a professional driver at Toll Group, where he discovered his passion for IT and transitioned into an Application Developer while pursuing his tertiary education. Since then, Martin has honed his skills in web development and demonstrated his expertise in various projects.

Alongside his work, Martin nurtures a keen interest in developing mobile applications and constantly expands his knowledge through self-learning. He is a proactive team player who thrives in a dynamic environment and seeks to make a positive impact through his work.
